

The topics and speakers

Facilitating the forum

Len Saputo, MD

Dr. Saputo is a graduate of Duke University Medical School and is board certified in internal medicine. He has been in private practice in Contra Costa County for more than 25 years. Len's approach to healing is based on an integrative model that blends mainstream and complementary and alternative medicine. He is a health educator, motivational speaker, medical editor and writer, and a television and radio personality. Len is the founder/director of the Health Medicine Institute and the Health Medicine Forum in Lafayette.

The role of Chinese medicine

Yoon Hang "John" Kim, MD MPH

Dr. Kim is board certified in preventive medicine, medical acupuncture, and holistic medicine. He graduated from the Medical College of Wisconsin, where he was honored as a Howard Hughes Fellow. He completed the UCLA Medical Acupuncture Training and also has completed a Master's degree in public health (MPH), focusing on health promotion. Dr. Kim serves as the Dean of Integrative Medicine at Acupuncture and Integrative Medicine College, Berkeley (AIMC) where he has developed integrative medicine programs in consulting, clinical services, and education.

Psychiatric care, not only for the patient, but also for loved ones

Steve Schane, MD

Dr. Schane graduated from the University of Michigan Medical School and did his residency at UCSF. He is board certified in psychiatry and is currently an assistant professor at UCSF's Langley Porter Clinic. He has practiced in Walnut Creek for more than 25 years. His personal experience with a loved one having died from breast cancer is in part related to his strong interest in guiding patients with breast cancer and their families. Often times family members minimize their needs, and too often they are overlooked. Care and nurturing the whole family is vital.

Using complementary/alternative medicine

Isaac Eliaz, MD, MS, L.Ac.

Dr. Eliaz, a pioneer in the field of integrative medicine since the early 1980's, is a respected author, lecturer, researcher, product formulator and clinical practitioner. He lectures on integrative medical approaches to health, immune enhancement, and cancer prevention and treatment. Dr. Eliaz developed and currently holds the patents for several of his unique herbal formulations. The guiding mission of Dr. Eliaz's professional life is achieving the integration and synergy of multiple healing modalities from both ancient and modern paradigms into a holistic practice of medicine.

The oncology options

To be announced

An Oncologist will discuss clinical treatments and technologies available today: surgery, radiation and chemo medication.

A Personal healing journey

A survivor

A survivor – who carefully considered her treatment protocol, and choose an approach that was blended from mainstream to complementary and alternative care – will share her experience.

Breast Cancer

Now what?

Are you newly diagnosed?
a survivor?
a family member?
or a health practitioner?

Join us to learn integrative options available.

Friday, May 19, 2006

6:00 - 10 p.m.
